New FMS Homepage

New Products - Web Tension Control

New Products - Web Guide Controller

On Site Consultation

Dear Customer,

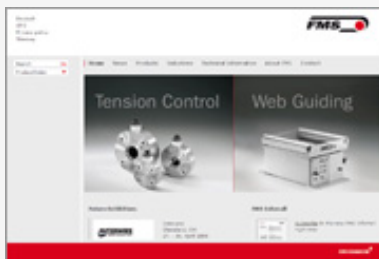

FMS, as a leading supplier of both web tension measuring and control systems and web guides is establishing a new channel of information for its customers with the FMS Infomail.

This comes in addition to the personal assistance from our staff and will allow us to supply you with essential and vital information on the selection and application of our products.

Furthermore, we will keep you updated on our new developments and progress including other FMS products e.g. belt weighing systems.

Yours faithfully

Derek Barlow

New FMS Homepage

Since early February 09 the new FMS Homepage has been online. Our priority was to structure it clearly and to equip it with the maximum amount of information to meet your requirements. Using the new product finder you are able to select products directly.

An extensive download area for technical documents as well as the new FMS Calculator have been set up to ensure your comfort while choosing and installing our products.

The English website can be found as of now at:

www.fms-technology.com

New Products - Web Tension Control

FMS is offering new product lines in the fields of force sensors with the C203-series and electronic evaluation units with the EMGZ309. These interesting new products are highly recommended for various applications because we are known for our consistent price optimization and excellent quality.

In the next issue of the FMS Infomail we will focus on the individual products in more detail.

If you should require more information please visit our homepage or contact our consultants.

New Products - Web Guide Controller

The development of the new web guide controller offers an economical and technically advanced solution for many applications. The controller can be coupled with all steering frames from the FMS-program. In combination with the corresponding edge and line detection sensors FMS can offer a complete solution to all web guiding applications.

For the parameterization or remote-control an ethernet-interface is available through which serial machines can be easily parameterized!
