

In this edition:

The FMS-Configurator. Web Guiding Configuration – Straightforward and Smart

Dear Customer,

First time users of FMS web guiding products will be thrilled in the experience with the FMS-Configurator leading the way to a powerful and cost effective web guiding system.

This sophisticated, yet easy to use, application is immediately available as a download from the FMS website.

The FMS-Configurator. Web Guiding Configuration – Straightforward and Smart

The ingenious configuration tool effortlessly guides you through the analysis of your web guiding application, determines the geometry of your steering frame, and supports you with an evaluation of the system components. For existing FMS customers the program provides an even faster and easier method to specify the required system for an application.

Thanks to the impressive features of the FMS-Configurator, you survey and control your web guide system design throughout the process:

- The graphical user interface provides an immediate and thorough overview
- Tooltips simplify the use of the program by providing important item information
- The geometry of your steering frame or actuator is determined automatically based on the material information provided during the survey
- A wide range of coating options are available for steering and idle rollers
- The tool supports the evaluation of the appropriate material sensor
- Concurrent written and visual feedback when each component selection is made
- 3D-view of the desired mounting position
- Delivers a complete bill of material of your system
- You can save your configuration in a database or in a file for easy sharing with others

In addition, the FMS-Configurator considers machine space limitations, dynamic constraints, and accuracy requirements to ensure that the web guide system is appropriate for your application. The result is a complete and powerful web guide system to meet

your specific technical needs and commercial targets.

Whatever your skills in web guide design might be, with the FMS-Configurator the successful optimization of your production process will be the end result.
